A private tasting alcove set in the winery's Carpet of Flowers garden. **Below:** Ona LeSassier's *Study of Stillness* triptych.

/ DESTINATIONS /

## Local Flavor

Architecture and nature have a wonderful way of coming together. But just like with most things in life, adding wine makes them even better. To create a new hospitality space for beloved California winery **Flowers**, Walker Warner Architects and interiors firm Maca Huneus Design refashioned 15,700 square feet of existing on-site structures into tasting rooms and dining spaces that echo the vineyard's commitment to sustainability. They even tapped wood artist Evan Shively to conceive monumental yet functional installations. Outdoors, terroir is expressed quite literally in the dynamic grounds cultivated by the firm Nelson Byrd Woltz Landscape Architects. Rich with native plants, terraces provide guests with the perfect refuge for savoring the quiet complexities of the winery's fruits. [flowerswinery.com](http://flowerswinery.com) —J.T.
